Java Platform, Enterprise Edition

- Pre vývoj komponentovo-orientovaných mnohovrstvových podnikových aplikácií
- Špecifikácia definovaná Java Community Process (JCP)
- Rôzne implementácie rovnakého API
 - JPA nájdeme v Eclipselink, OpenJPA, Hibernate
- Certifikácia
- Návrhové vzory:
 - Viacúrovňovosť – prezenčná, logika, business logika,...
 - Väčšie rozmery aplikácií
 - Škálovateľnosť
 - Spoľahlivosť
 - Bezpečnosť

Java Enterprise Edition

Vývoj:

- **webových aplikácií** – Java Servlety, JSP, JSF
- **prístupu k relačným DB** – Java persistence API
- **zdieľanej podnikovej logiky** – Enterprise Java Beans (EJB)
- **vkladania závislostí** - Context and Dependency Injection
- **prístupu k ukladacím systémom** – Java Conector Architecture (JCA)
- **prístupu a správy strednej vrstvy** – Java Messaging Service (JMS)
- **Komponentov zabezpečujúcu integráciu webových aplikácií** – Portlety

- **webových služieb**

Verzie

- Java EE 6 (December 10, 2009)
- Java EE 7 (June 12, 2013)
- Java EE 8 (September 21, **2017**)
- Další vývoj ???

Java EE 7

Java EE 7 témy

Java EE 8

Java EE 8 - Prehľad

- Pokračujúce vylepšenia skladanie webových štandardov
 - HTTP/2, JSON Binding, JSON-P, MVC
- Vylepšenie práce s Cloudom
 - bezpečnosť, RESTful Management API
- CDI Programming Model
 - Jendnoduchšie použitie, EJB cez CDI
- Menší – ale s dôležitými funkciami
 - Caching, lepšia správa Správ - Messaging
- Zosúladenie sa s Java SE 8

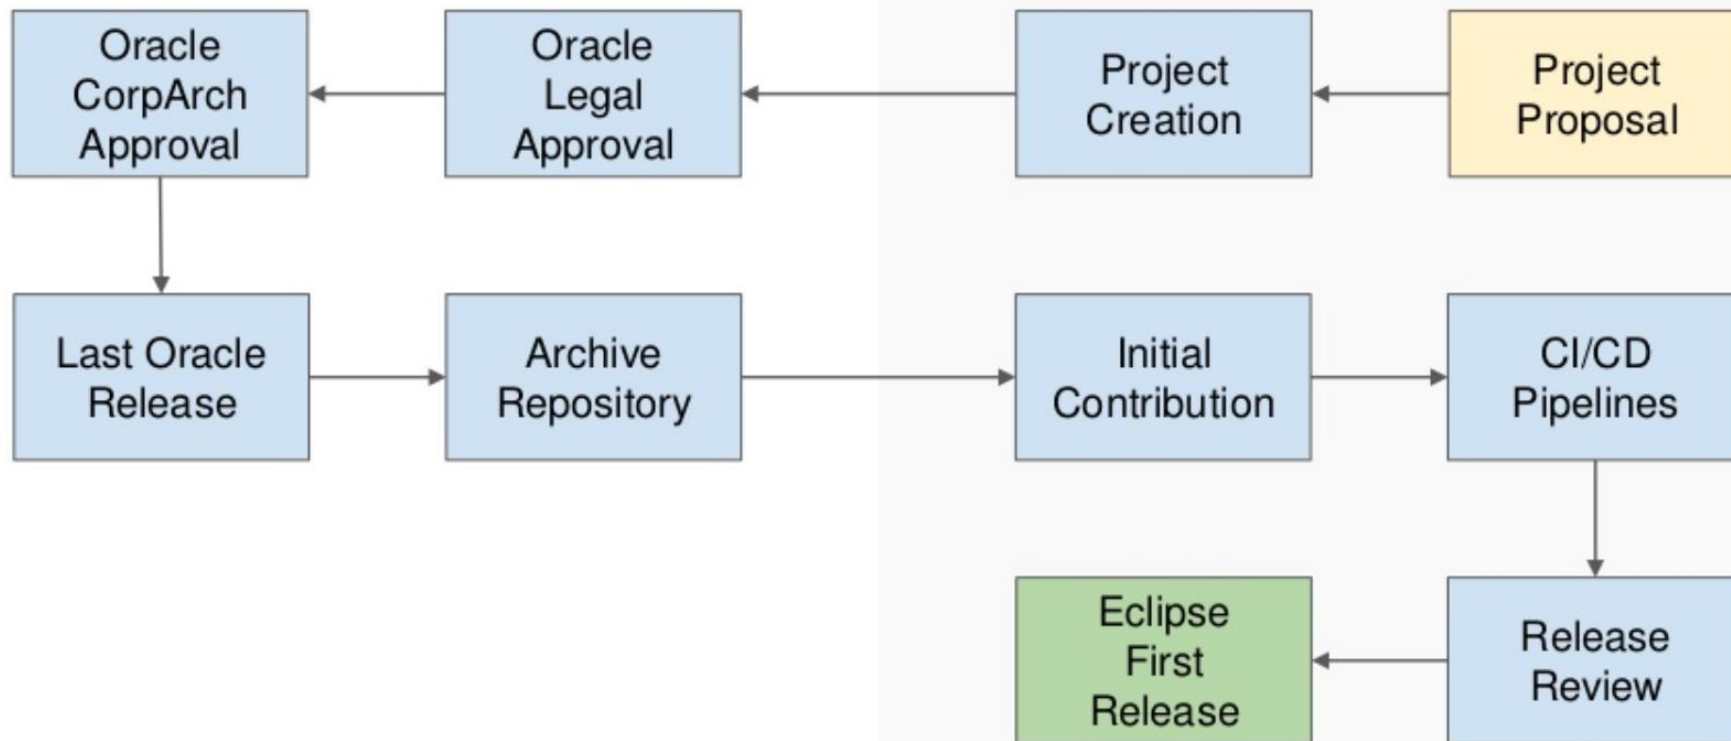

Eclipse Enterprise for Java – EE4J

Čo sa prenieslo?

- Java EE – špecifikácia
- Java EE API
- Java EE – referenčná implementácia
- Java - Technology Compatibility Kit
- Návod, dokumentácia, príklady

Evolúcia Jakarty EE

Prečo Jakarta EE?

- **9/2017** - Oracle prevádza práva Java EE na Eclipse Foundation – nie práva na Java jazyk
- Java je registrovaná na Oracle
- Vznik **Jakarta EE** - JEE
- Nemôžu sa vytvárať nové balíčky v **javax**
- Možnosť dopĺňania nových do existujúcich

Version	Date
J2EE 1.2	December 1999
J2EE 1.3	September 2001
J2EE 1.4	November 2003
Java EE 5	May 2006
Java EE 6	December 2009
Java EE 7	April 2013
Java EE 8	August 2017
Jakarta EE	February 2018*

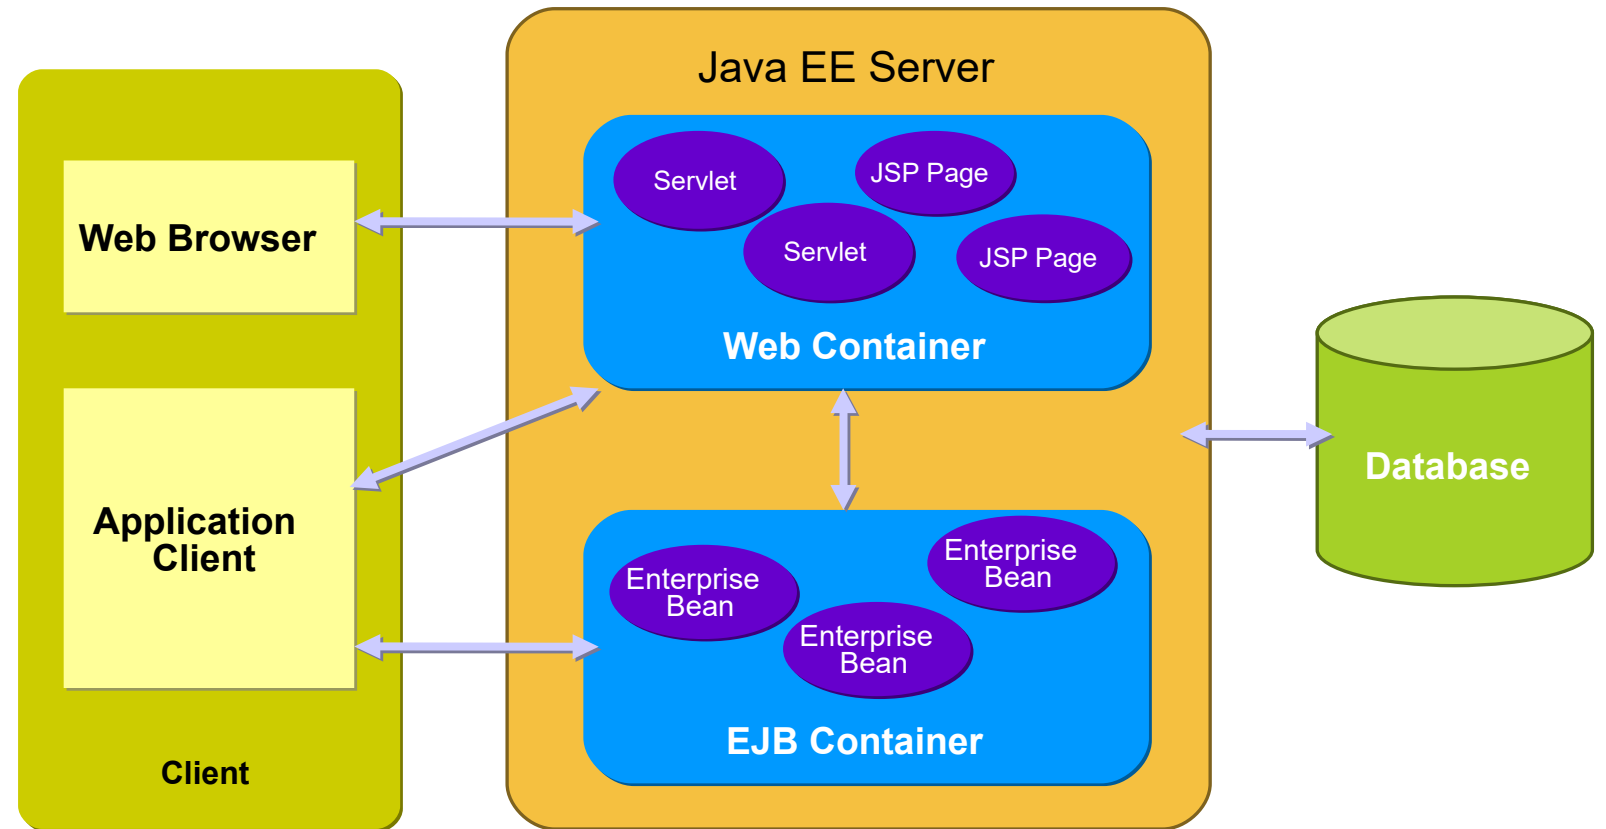

Zmena?

Pôvodné pomenovanie	Nové označenie
Java EE	Jakarta EE
Glassfish	Eclipse GlassFish
Java Community Process (JCP)	Jakarta EE Working Group
Oracle Development Management	Eclipse Enterprise for Java (EE4J) Project Management Committee (PMC)

Java EE architektúra

NEW RELEASE

Jakarta EE 10

Community-Driven

Modernized

Simplified

Lightweight

Jakarta EE 10

- vydaná 13.9.2022
- predchádzajúce verzie:
 - Jakarta EE 9.1 - 2021
 - Jakarta EE 9 - 2020
 - Jakarta EE 8 - 2019
 - Java EE 8 - 2017
- podpora:
 - Java SE 17
 - Java SE 11
- označené ako „deprecated“:
 - Servlet, Faces, CDI and EJB (Entity Beans and Embeddable Container)

	Authentication 3.0	Persistence 3.1	
Authorization 2.1	Concurrency 3.0	Server Pages 3.1	RESTful Web Services 3.1
Activation 2.1	CDI 4.0	WebSocket 2.1	JSON Processing 2.1
Batch 2.1	Expression Language 5.0	Bean Validation 3.0	JSON Binding 3.0
Connectors 2.1	Faces 4.0	Debugging Support 2.0	Annotations 2.1
Mail 2.1	Security 3.0	Enterprise Beans Lite 4.0	Interceptors 2.1
Messaging 3.1	Servlet 6.0	Managed Beans 2.0	Dependency Injection 2.0
Enterprise Beans 4.0	Standard Tag Libraries 3.0	Transactions 2.0	CDI Lite 4.0

Too late...

What programming languages are you using at work?

New order

JAKARTA EE 10

FEATURES AND BENEFITS

Jakarta EE 10 is packed with new features for building modernized, simplified, and lightweight cloud native Java applications. This new innovative community-driven release is designed for organizations looking to start developing new enterprise Java applications or advancing their existing ones.

MODERNIZED

The Jakarta EE 10 release provides new functionality in over 20 component specifications.

[Learn more](#)

SIMPLIFIED

With Jakarta EE 10, application development is made simpler by supporting the broader use of additional annotations

[Learn more](#)

LIGHTWEIGHT

Jakarta EE 10 defines a new profile specification with Jakarta EE Core Profile 10. The “Core Profile” which defines a multi-vendor platform for modernized and lightweight Java applications and microservices.

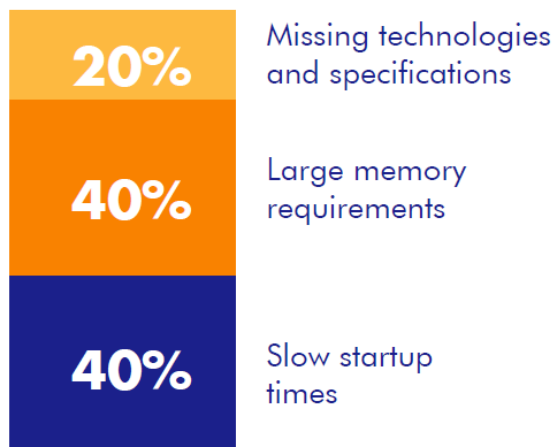

[Learn more](#)

Building on Java EE success

Sometimes it's easy to take for granted a technology that most enterprise IT organizations rely on to run their most critical applications.

The most challenging aspects of working with Java EE

How can the Eclipse Foundation evolve Jakarta EE to meet your cloud needs?

The cloud native Java imperative

Organizations are becoming more comfortable deploying mission critical Java applications beyond the data center.

Today: 50% of developers run less than 20% of their Java applications in the cloud.

By 2020, over 30% of developers expect to run more than 60% of their Java applications in the cloud.

Jakarta EE 10 – Novinky, úpravy

- Jakarta Contexts and Dependency Injection (CDI) 4.0, including CDI-Lite that enables build time extensions
- Jakarta Security 3.0 supporting OpenID Connect
- Jakarta Servlet 6.0 for simplified programming and improved security
- Jakarta Faces (JSF) 4.0 with a modernized API using CDI
- Jakarta JSON Binding (JSON-B) 3.0 with new support for polymorphic types
- Jakarta RESTful Web Services standardizes a Java SE Bootstrap API and standard support for multipart/form-data
- Jakarta Persistence standardizing UUID as Basic Type and extending Query language and Query API
- Jakarta Concurrency 3.0 is moved to the Web Profile and enhances parallel and reactive programming models available to applications

Jakarta EE 10 - bezpečnosť

- nový autentifikačný mechanizmus:
 - OpenID Connect

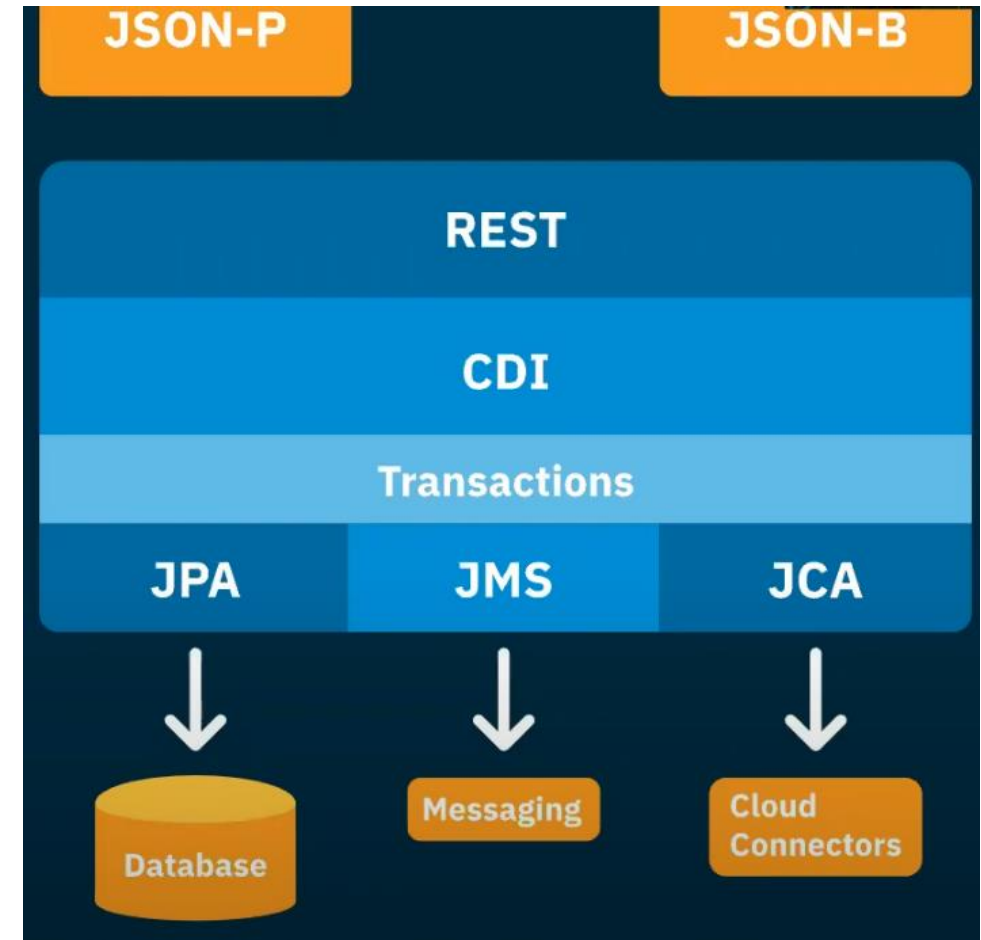

```
@OpenIdAuthenticationMechanismDefinition(  
    providerURI = "http://oidc-provider",  
    clientId = "client",  
    clientSecret = "secret",  
    redirectURI = "${baseUrl}/Callback",  
    redirectToOriginalResource = true  
)
```

Jakarta RESTfull Web Services 3.1

Jakarta EE 10 - mikroservisy

- možnosť vytvárať mikrosevisy menšie
- napr. Payara Cloud Connectors
- <https://payara.fish/products/ecosystem-catalog>
- JCA adapter:
 - Apache Kafka
 - Amazon SQS
 - Azure Service Bus
 - MQTT

Jakarta EE 10 - mikroservisy

- možn

- napr.

- [https:](https://)

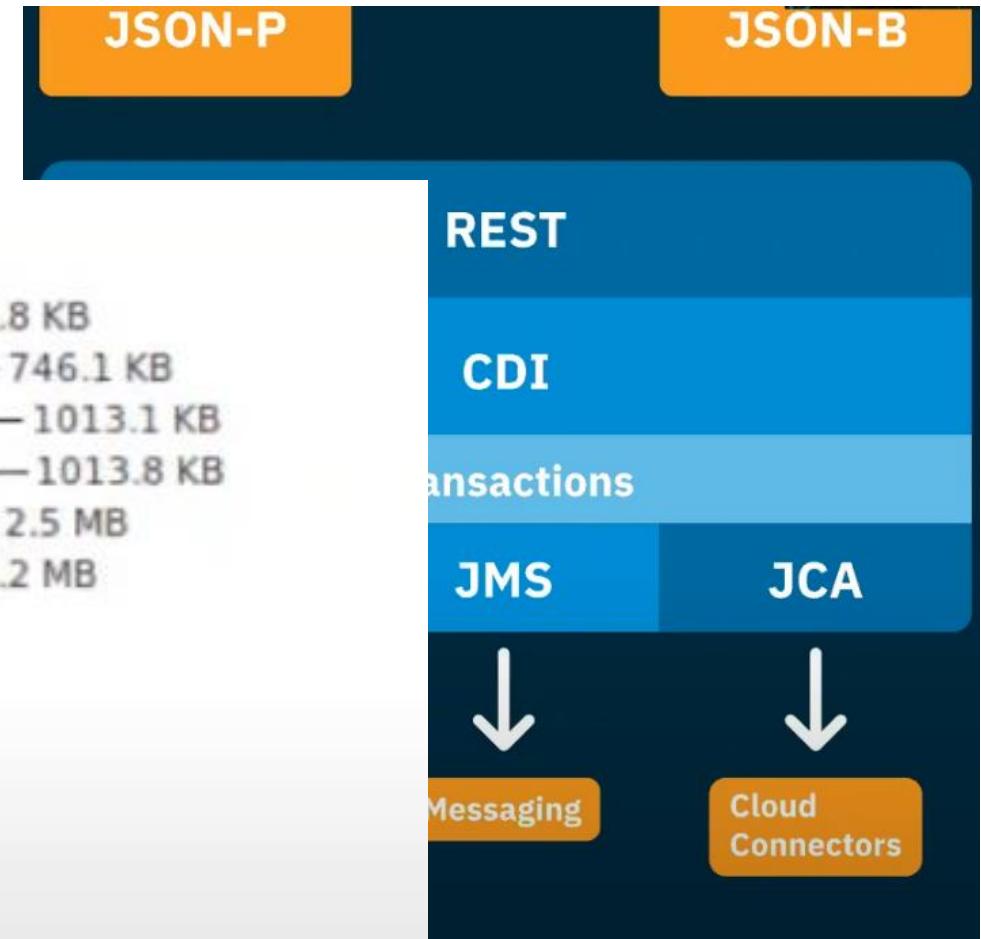

- JCA a

- A

- A

- A

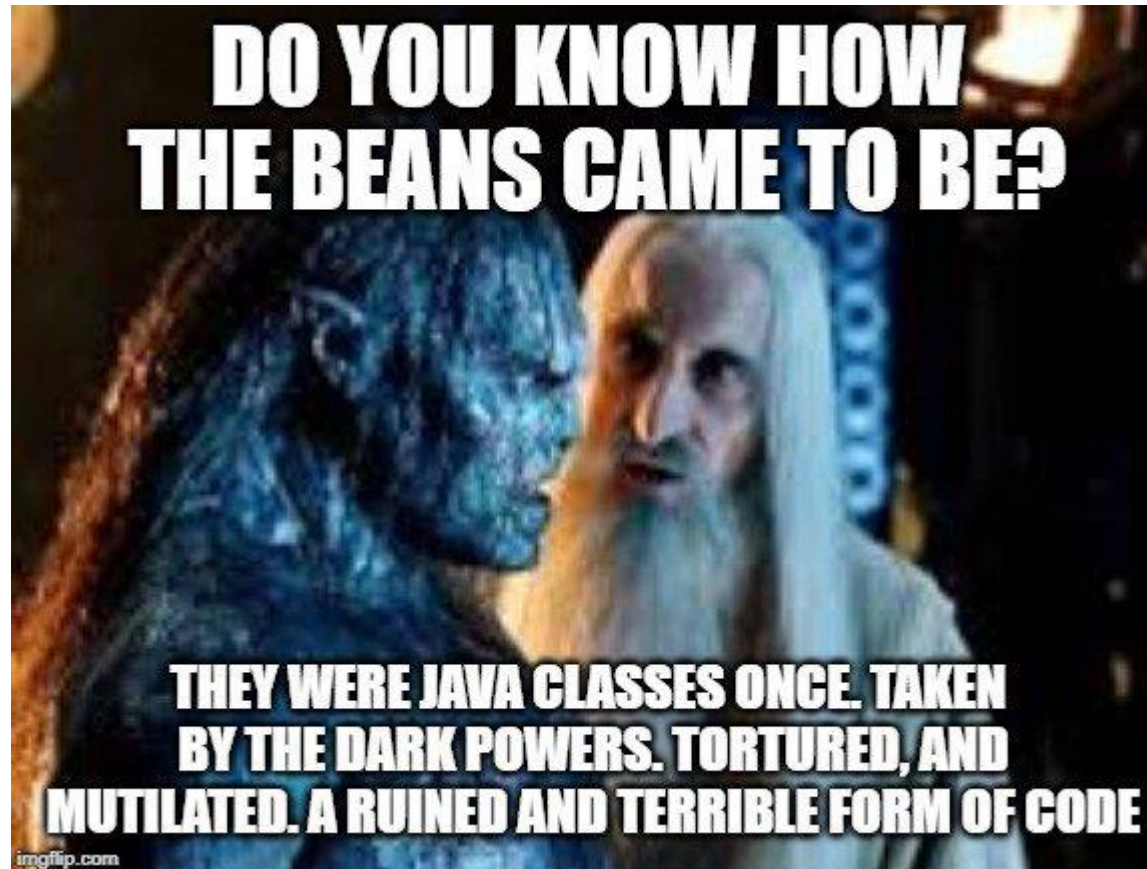

- f

Jakarta EE Platform 11 (vo vývoji)

- očakávané vydanie: jún/júl 2024
- podporovaná Java SE 21, minimálne od Java SE 17
- Nové funkcionality:
 - Java Records
 - JDK Runtime pre virtuálne vlákna
 - Jakarta Data 1.0 – jednoduchší prístup k údajom
- Odstránené:
 - ManagedBeans
 - Security Manager
 - voliteľné špecifikácie

Ďakujem za pozornosť
